

ORACLE RETAIL XSTORE DEVELOPER BOOT CAMP

Oracle Retail Xstore Point of Service (ORXPOS) V15 Java POS is a flexible, fast, and powerful software solution. With Xstore, the store associates can process transactions quickly, respond to inquiries efficiently, extend personalized offers based on customer history, and provide the personal touches with in-store clienteling that are certain to strengthen customer loyalty.

What will we cover?

In this Training Program you will gain a detailed understanding of the Xstore V15 end-user functionality along with the technical framework of the application.

Learn To:

- Implement code and configuration changes in Xstore and Xstore Mobile
- Integrate Xstore with third party applications and customize Xstore integrations to other Oracle applications
- Create new reports and update existing reports
- Write Xunit automated test scripts
- Run Xstore in multiple languages
- Implement payment authorizations using the Xstore authorization framework
- Setup Xstore deals and understand how deals are processed
- Use Xadmin and understand its underlying technical principles
- Troubleshoot and resolve Xstore application issues as a result of the training

Duration:

The Boot Camp is instructor-led via Live Virtual access and has been created to span 5 days.

Note: The duration is intended for general reference. All content created will be delivered as intended for successful knowledge transfer. The Boot Camp instructor may adjust the session based upon the pace of the class and the needs of the participants. Overall daily agendas may vary by region effecting the overall scheduled agenda – including start / end times. Please be sure to reference all materials to ensure your complete participation.

Students are required to participant for the full duration and will not be permitted to join post start to ensure a good learning experience for all participants.

Level of Enablement:
